

**Public Tender No. PD22000956**  
**For the Provision of Engineering, Procurement & Construction (EPC) Services**  
**Fuel Storage Tanks Construction Project**

**Contractors Tour Summary**  
**The Tour Took Place on Sunday 20/11/22 at the Eshel Fuel Terminal**

The following is a summary of the Contractors' Tour held on 20/11/22. This document forms an integral part of the Tender Documents.

Capitalized terms shall have the meaning ascribed to them in the Tender Documents.

1. The Contractors' Tour was held in the Eshel Terminal site, where the head of the engineering division and the project manager explained the main terms, conditions and Threshold Conditions of the tender. The main stages of the work were also presented in general.
2. The chief designer of Ludan Israel showed a presentation on technical issues that are mentioned in annex H.
3. A representative of the industrial cooperation authority at the ministry of Economy and industry had presented and explained all the procedures that are required from a non-Israeli Bidders participating in the tender.
4. It is clarified that the employment and attendance of foreman and EHS manger is mandatory by the Israeli regulations and laws of the labor office. The cost of this term must be considered in the bidder proposal.
5. Water and electricity- Water – the contractor shall get all the water he needs for his works at site. The nearest water hydrant is located in the north side of the construction site. The contractor will be responsible for the supply of all parts and execute all the works required for the connection to the existing water net.

Electricity- the Company is planning to lay down high voltage and low voltage infrastructures as part of the scope of works of the general project. If the infrastructure will be completed until the commencement of the erection of the tanks on site the contractor could connect to this infrastructure for his works. It is hereby clarified, that the aforesaid does not impose any obligation on the Company, and the Bidders will not have any claim towards the Company in the event that the infrastructure will not be completed until the commencement of the erection of the tanks. As written above, all the parts and works that are required will be done by the contractor.

If the infrastructure will not be completed until the commencement of the erection of the tanks, the contractor will supply generators or alternative power sources, and the Company will pay him monthly for the use of those tools.

The contractor will attach price offer for the supply of those power sources in the following table.
