

July 27, 2023  
 Ref.: 301394

To: All Tender Participants

Dear Sir / Madam,

**Re: Public Tender No. PD23000322 (the "Tender") – Clarifications**

1. The Company has received certain requests for clarification regarding the Tender, in accordance with Section 5.1 thereof, provided below (the "Questions"). Next to each Question is the Company's answer, which shall be considered by the Company as authoritative.

	<b><u>Question</u></b>	<b><u>Answer</u></b>
1	Required is a Design acc. ASME Code Sec. VIII Div.1, we will ask your approval to offer designing standard German AD-2000 with ANSI Flange 300lbs RF (instead of the required ANSI flange 150lbs RF), because this is necessary for 20bar and 65° Design Temperature	ANSI flange #150 RF is required
2	Par. (7) - Filter shell Body: Tender asks for CS , A 216 Gr. WCB. However, we can offer pipe (SA-53B or SA-106B) or rolled plate (SA-516-70) with similar mechanical strength	SA516 is approval
3	Data sheet - Corrosion Allowance: the requested corrosion allowance (3mm) is significantly high. So that the corrosion allowance added to the calculated design thickness, is more than the nominal thickness of the requested NPT couplings	Can offer the nominal thickness according to NPT couplings requested
4	Data sheet - Flange type: The datasheet requests a Welding Neck flange type. However, we propose using a Slip-On type instead, which could result in cost savings and a smaller filter size. Let us know if it is acceptable	Can offer slip on instead
5	Par. (5.7) - RT test: RT specified in Paragraph 5.13, is not mandatory per design code	Ok

6	Is there a list of approval suppliers?	No, the bidder have to register for the specific tender on the company's website in order to receive updates
7	If a foreign supplier would like to send offer, does he required a digital signature?	Yes, according to the instructions detailed in the tender documents

2. Thank you for your continued interest in the Tender; we look forward to receiving your bids.

Sincerely,

*Talmor*
