

Membrane Cartridge

Type H-510 Membrane Cartridge.

Model – H-510

Dry Weight 3.2 (kg)

Membrane Sheet Micro filtration (MF) membrane Nominal Pore Size 0.4 (mm)

Effective membrane area 0.8 (m²)

Initial performance - Clean water initial permeate flow 930 (mL/min) or more, water temp. 20C°, filtration pressure 5 (kPa)

Use conditions – Cartridges are used in a form of KUBOTA submerged membrane Unit (Kubota SMU).

Chemical for cleaning sodium hypochlorite with effective chlorine concentration of 1.0%.

Water temperature 5-40C°

pH 1-10 (pH: 5-10 is the use condition SMU)
